

## Extreme Performance Summer

You want extreme dry street performance and are willing to trade some comfort and hydroplaning resistance to get it.

Not intended to be driven in snow or on ice, or at high speeds in deep standing water, these specially tuned tires combine big-block tread designs with aggressive tread compounds and reinforced internal constructions to emphasize dry road response, traction, handling and high speed capabilities for serious driving enthusiasts.

## Ultra High Performance All-Season

You want all-season versatility (including light snow traction) and are willing to trade some dry and wet traction and handling to get it.

Branded with the M+S symbol, these ultra-low profile tires are designed to provide year round traction (even in light snow) through tread designs and compounds that remain more flexible in the cold weather to help blend all-season traction with very good handling and high-speed capabilities.

## High Performance Summer

You want a good blend of dry and wet street performance when “re-tiring” your sports coupe or sedan.

Not intended to be driven in snow or on ice, these low profile tires are designed to provide responsive handling and crisp steering response in both wet and dry conditions.

## High Performance All-Season

You want all-season versatility (including light snow traction) to drive your sports coupe or sedan in all weather conditions.

Branded with the M+S symbol, these low profile tires are designed to provide year-round traction (even in light snow) through tread designs and compounds that remain flexible in cold weather to help blend all-season traction with good handling.

## Grand Touring Summer

You want a good blend of dry and wet street performance along with responsive handling and noise and ride comfort.

Not intended to be driven in snow or on ice, these tires are designed to blend a performance tire’s appearance with a passenger tire’s smooth, quiet ride. Grand Touring tires are often used as Original Equipment and place more emphasis on handling and high-speed capabilities than Standard Touring tires.

## Standard Touring All-Season

You want all-season versatility (including light snow traction) along with enhanced handling and treadwear, as well as good noise and ride comfort.

Branded with the M+S symbol and capable of providing year-round traction (even in light snow), these tires are designed to blend a performance tire's appearance with a passenger tire's smooth, quiet ride. Standard Touring tires are typically available in the lower speed ratings and higher aspect ratio sizes and place more emphasis on ride comfort and treadwear than Grand Touring tires.

# Winter

## Performance Winter/Snow

You want enhanced dry road handling from your winter tires and are willing to trade some snow and ice traction to get it.

Meeting severe snow service requirements and branded with the “Mountain/Snowflake” symbol, these low profile, H- or V-speed rated tires are designed to suit winter driving on European highways. They are available in many of the low profile sizes used as Original Equipment on sporty imported and domestic cars. Due to their unique designs these tires must be installed in sets of four.

## Studdable Winter/Snow

You want winter tire studs for traditional traction on ice.

Meeting severe snow service requirements, these tires feature traditional winter compounds and tread designs that can be studded for traction in snow and on ice. Use of studded tires is often prohibited or restricted. Check with local authorities to confirm legality. Must be used in sets of four.

## Studless Ice & Snow

You want to maximize snow and ice traction from your winter tires without the inconvenience of using winter tire studs.

Meeting severe snow service requirements and branded with the "Mountain/Snowflake" symbol, these Q-speed rated tires feature the latest in tread compound technology to provide winter traction without the inconvenience of tire studs. They trade a little handling for excellent ice and snow traction. Due to their unique tread compounds these tires must be installed in sets of four.

## Highway Rib Summer

Your pickup, van, SUV or motor-home uses heavy-duty tires designed to provide on-road traction in dry and wet conditions.

These heavy-duty light truck/SUV tires feature rib-type tread designs developed primarily for street and highway use. They emphasize even wear, low noise and good traction on dry and wet roads, but like all summer tires, are not intended to be driven in near-freezing temperatures, through snow or on ice.

## Street/Sport Truck Summer

You want a sport truck appearance and dry and wet road performance for your pickup, crossover or SUV.

These wide, low profile and large rim diameter tires enhance a vehicle's looks and performance when used to replace most Original Equipment tires. They emphasize traction and handling in dry and wet conditions, but like all summer tires, are not intended to be driven in near-freezing temperatures, through snow or on ice.

## Crossover/SUV Touring All-Season

You want a stylish appearance, sophisticated comfort and all-season on-road traction for your upscale crossover, SUV or luxury pickup.

These tires combine the sporty appearance of Street/Sport Truck tires with much of the ride quality and noise comfort associated with Highway All-Season tires. While they offer all-season versatility, including traction in light snow, tire sizes featuring extremely wide tread widths may limit the traction this type of tire can provide in deep snow.

## Highway All-Season

You want pleasing comfort, predictable handling and all-season on-road traction for your crossover, SUV or pickup.

These tires typically feature independent tread blocks and multiple sipes positioned around the tire to combine good on-road (including gravel and dirt roads) poise with foul-weather traction. They are branded with the M+S symbol and capable of providing all-season versatility, including traction in light snow.
